

Infosys Food Trends

☼ TEAM C

Core Focus:

Understanding Customer Preferences in Food & Beverages

Project Tagline:

Exploring changing customer behaviors and preferences in the Food & Beverage industry

Presented By: Priya Mahato

The **Infosys Food Trends initiative** represents a strategic effort to revolutionize food services through artificial intelligence, machine learning, and advanced analytics. The project aims to explore changing customer behaviors and preferences in the Food & Beverage industry while creating smarter, sustainable, and more accessible food solutions within Infosys campuses and broader networks.

Changing Customer Behaviors

Artificial Intelligence

Smarter Food Solutions

Sustainable Operations

Campus-Wide Implementation

STRATEGIC OBJECTIVES

01 Market Research & Analysis

- Study global F&B market developments
- Analyze Indian food industry emerging trends
- Monitor consumer behavior patterns

02 Customer-Centric Understanding

- Map customer expectations and dietary preferences
- Predict future eating habits and trends
- Identify nutritional requirements and wellness focus

03 Competitive Benchmarking

- Compare Infosys food services with industry leaders
- Evaluate best practices in corporate dining
- Assess innovation gaps and opportunities

04 Data-Driven Insights

- Using advanced analytics to optimize operations
- Inform decision-making.

Infosys FoodTrends: Understanding Customer Preferences in F&B

Customer Overview

18-22
First Age_Group

Gender Distribution

Age Group Breakdown

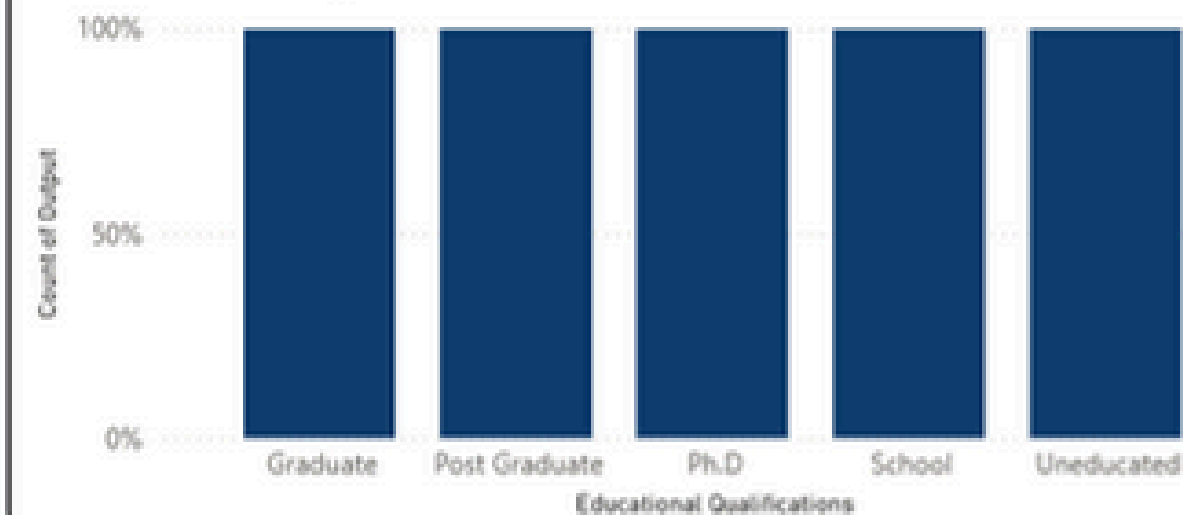

Family Size Distribution

Occupation vs Monthly Income

Education vs Output

KEY METRICS VISUALIZATION

Demographics

52.7% Male, 47.3% Female - Balanced gender representation
Peak age group: 26-35 - Working professionals dominate
Age decline after 40 - Younger workforce engagement

Dietary Preferences

Omnivore majority - Traditional eating habits prevalent
Growing plant-based segment - Health-conscious trends visible
Equal macro distribution - Diverse nutritional needs

Activity Patterns

Extremely Active = 3K calories - Highest energy needs
Sedentary = 2K calories - Lowest requirements
Moderate Activity dominates - Office lifestyle pattern

Health Metrics

Wide BMI variation - Personalization needed
Height range: 150-200cm - Diverse body types
Stable weight averages - Healthy population baseline

01

Expand Successful Pilots

Roll out successful pilot programs across additional Infosys locations to scale the benefits.

02

Foster Collaborations

Actively build collaborations with startups that are focused on sustainable food solutions and tech-driven innovations.

03

Incorporate Continuous Feedback

Implement ongoing customer feedback systems to continuously refine and improve our offerings.

04

Prioritize Waste Management

Make food waste management a priority by using predictive analytics and data-driven demand forecasting.
